CONTENTS

Prefatory Note

With the introduction of the new Curriculum and Syllabuses since 1981, the Policy of Non-Detention at the Primary education level is being pursued in West Bengal. The success of this policy of non-detention however, presupposes the successful implementation of the school based system of Continuous and Comprehensive Evaluation (CCE) which the West Bengal Board of Primary Education has been meticulously following since its inception. Keeping in view the importance of CCE the Board introduced two External Evaluations one at the end of Class II and the other at the end of Class III to be administered centrally by the Board basically with the objective to make an appraisal study of the CCE as conducted by the schools. As a matter of fact, the Board administered External Evaluations are also meant for diagnosis, remediation and promotion of teaching - learning at the school level and identification of hard spots in curriculum & syllabuses as well as in the textual materials. These tests on the other hand, at the macro-aggregative level can identify districts that are lagging behind in respect of attainment of desired achievement level. Promotional measures can be suggested for them as a matter of policy-decision. This Report seeks to place the details of the External Evaluation held at the end of Class II for the year 2008 and a statistical analysis of the results and the basic findings that follow from such analysis.

Handling of the huge raw data to find out the mean achievement level and the relevant standard deviations is definitely a stupendous task. Collection of data from the district is also no less stupendous. All these however, become possible because of the whole-hearted cooperation we receive from the DPSCs & Kolkata Municipal Corporation. We are also thankful to the School Education Department, Directorate of School Education, West Bengal and the Paschim Banga Sarva Siksha Mission for their cooperation and whole-hearted support.

Most of the tables are self-explanatory in nature and their graphic presentation makes them easier to understand and gives a bird's eye-view of the entire theme.

All that we can claim is that we have made our sincere attempts. We are really eager to know how far we have become able to stand up to what is expected from us. Let our quest for quality be successful through our untiring efforts and whole-hearted support from all those who are interested in Primary Education in West Bengal.

President

EXTERNAL EVALUATION, CLASS-II – 2008

A REPORT

01. INTRODUCTION

This is the 10th in the series of External Evaluations so far undertaken by the West Bengal Board of Primary Education since it's inception in 1999. It basically seeks to diagnose rather than to rank the individual performances or to declare someone as successful and others as unsuccessful. Individual Question-Answer Sheets are shown after evaluation to the parents and guardians in order to give them an idea about the achievement levels and deficiencies of their children. Individual student's performance subject-wise shows his achievement level as well as his deficiency, if found any, for which proper remedial teaching may be adopted by the school (micro-level). District-wise aggregative (macro-level) performance indicates which district(s) are lagging behind making it an imperative for those lagging behind to adopt suitable measures to promote the achievement level. The External Evaluation thus acts as Diagnostic Tool (i) to identify the strengths and weaknesses of individual students at the micro level, (ii) to rank the districts not the individual candidate according to their performances and suggestions to take up promotional measures for those lagging behind, (iii) to identify the hard points in the Curriculum necessitating their modification and finally (iv) to make an evaluation of the teachers and the teaching – learning strategy adopted.

The current Report highlights some of the major features of External Evaluation, namely

- External Evaluation Module: How Test items have been prepared
- Brief description of how External Evaluation was conducted
- Brief Interpretations of the Tables & Graphical Representations
- Statistical Glossary
- Some Observations
- Concluding Remarks

02. External Evaluation Module: How Test items have been prepared.

It was decided that the basic objective of this External Evaluation would be to measure the attainments of expected competencies and at the same time to locate where the shoe pinches are. The weaknesses of the learners could be identified at the Micro Level and Class-room transactional procedures being followed by the teachers as well as the textual materials as developed by the Board could be evaluated. Hard points if any in the Curriculum, could also be identified for rectification.

With the above-mentioned objectives in view it was decided first which fundamental competence areas in the respective subject areas namely, First Language, Second Language (English) and Arithmetic were to be tested. This is an important issue in scientific designing of question papers and has been duly emphasized in modern theory of testing, namely, Item Response Theory. However, some of the important competence areas were identified and test items both of objective and subjective types with proper weightage to each of them were developed and finalized after proper standardization. Full marks for the paper were however, confined to 50 and time allotted was 2 hours. It may be noted in this connection that with the Constructivist Approach gaining ground all efforts have been made to incorporate in the preparation of the test item children's own way of constructing knowledge. The clear distinction between knowledge and information has always been kept in mind while preparing the test papers.

03. Brief description of how External Evaluation was conducted.

With the help of eminent experts the Board first prepare question-answer sheets containing the questions and space for their answers for each subject. Then the Hard Copy along with the CD containing the matter is handed over to the district authorities i.e. District Primary School Councils (DPSCs) in time. Answer Keys and marking schemes were also furnished for standardized evaluation. Students were to sit for the External Evaluation in their own schools with teachers of neighboring schools working as invigilators and evaluators. A guideline in details for effective management of the External Evaluation clearly indicating the Pre-External Evaluation, During-External Evaluation and Post External Evaluation management steps was issued. The District Primary School Councils were instructed to form an Evaluation Sub-Committee involving distinguished members of the community. Mode of selection of evaluators and modalities for safe-keeping of question papers in the custody of Circle S.I were also clearly spelt out. The ratio of invigilator – evaluators and students was fixed at 1:30, 2:50 and 3: above 50. The invigilator-evaluators were to look over the written answer-scripts as per guidelines supplied immediately after the evaluation was over and prepare Mark-Roll of students and submit to the respective Head Teachers in a proforma designed by the Board. The Head Teachers were to submit to the Circle **S.I.** the details of the students' score and other particulars in a specific format provided by the Board. The Circle S.I. was to forward to the respective District Primary School Council the school-wise report received by him indicating the details of school-based performance in different slabs of marks. The District Primary School Councils in their turn were to submit the same to the Board.

Instructions are given by the Board which are included in the guideline to the schools through the respective District Primary School Councils to arrange for remedial teaching on the basis of the weaknesses in learning competencies as revealed by evaluation of the answers in the Question-Answer Sheet.

04. Brief Interpretations of the Tables & Graphical Representations.

The presentation of statistical data starts with tables summarizing information relevant to the Evaluation. These tables are self explanatory in nature showing the total number of schools, total number of enrolled students and the total number of students who participated in the evaluation.

A comparative study of the yearwise performances of the districts:

From the information presented it is clear that of the total number of boys enrolled in all the schools, 81.14% participated in the evaluation. The highest one of the participation in the three subjects First Language, Second Language (English) & Arithmetic has been calculated. Evaluation, external in nature and centrally administrated, seems to encourage the students to participate.

Of the total number of girls enrolled, 83.13% participated in the evaluation. This is 1.99% higher than that for boys (81.14%). This is definitely encouraging.

Summary Table

Statistics is an essential database management tool. Proper statistical methods can produce meaningful insight into a huge database. The main summary table provides basic information on the State and on each of the districts for each subject separately. In the district-wise analysis, performances of different groups **SC**, **ST**, **Others** and in each one of them boys and girls categories have been shown using three different Class Intervals, 0 – 19, 20 – 39, and 40 – 50.

Number of Schools

Total number of participating schools in each district has been shown and the total number of enrolled students in different categories and the total number participated in External Evaluation have all been shown. Participation refers to the total number of students in each of these categories who actually sat for External Evaluation in the district. A total of three class intervals namely 0 – 19, 20 – 39, and 40 – 50 have been chosen to summarise the frequency distribution of marks.
As the frequency distribution for the State as well as for the districts are given it is expected that variability may be checked.

Percentile Achievement:

One table representing the frequency distribution of marks (%) secured by students in each subject (in slabs of percentages of the total) in the districts who appeared at External Evaluation in five class intervals namely, less than 20%, on and above 20% but less than 40%, on and above 40% but less than 60%, on and above 60% but less than 80% and more than 80% shows the summary of the distribution of marks with frequencies expressed in percentages: obviously wide approximation has been accepted to convert the ordinary class interval into percentile ranges.

State Mean Marks

It is the mean marks obtained by all the students in the state who appeared in this External Evaluation. It has been calculated from the frequency distribution of marks shown in the table related to the State data. The table shows the subject wise State Mean Marks for the year 2005, 2006, 2007, 2008. Improvements are indicated. Another table showing a comparative study of the yearwise performances of the districts is also placed below :

District Mean

Similarly mean marks (or average achievement level/ performance) in each of the subjects for each of the districts have been calculated. As there is no such system as pass or fail, no attempt has been made to locate anything such as success rate. But districts with mean marks below, above or on the borderline of the State Mean Marks (with leverage of 2 marks allowed on either side) for the year 2008 have been located basically with a view to drawing attention for promotional measures for those lagging behind. The Table below shows this.

Standard Deviation :

Standard Deviation for the State as well for each of the districts have been shown to give an idea about the variability/ consistency of the performance about the mean.

05. Statistical Glossary

Raw and ungrouped data when divided into a suitable number of class intervals by class limits yield the number of observations falling in each class interval. These are called class frequency (f) and entire distribution is known as frequeney distribution. For such a grouped data represented by a frequency distribution the mean is given by

$$\text{Mean (Grouped)} = \frac{m_1f_1 + m_2f_2 + \ldots}{f_1 + f_2 + \ldots}$$

Where m_1, m_2, etc. are the midpoints of the class intervals of the frequency table under consideration and f_1, f_2, ... are their corresponding frequencies.

Similarly, Standard Division has been calculated on the basis of the formula :

$$\sigma_x = \sqrt{{}^1/_N \Sigma fi (x_i - \bar{x})^2}$$

Where N =Σfi and σ (Greek small letter sigma) is indicating the S. D.

Bar Diagram: It consists of a group of equi-spaced rectangular bars one for each class of given statistical data. The bars are of equal width and their lengths represent the values of statistical data. They are shaded and coloured suitably. In our case grouped / paired bar diagrams vertically set have been used to show the comparison of two or more sets of related statistical data.

Pie Diagram has been widely used in analyzing the results. Pie Diagram is a circle whose area is divided proportionately among different components by straight lines drawn from the center to the circumference of the circle. Value in each category has been expressed as a percentage of total and multiplied by 3.6° to locate the angle for the component at the centre.

Skewness: Lack of symmetry in frequency distribution is indicated by its skewness and Gamma Co-efficient (Greek letter gamma) are used as measures of skewness i.e., whether the distributions are positively skewed, negatively skewed or symmetrical.

Skewness as shown in the figure with tail extending towards right hand side implies that more students are towards higher class interval of marks whereas districts wise skewness showing longer tails towards left indicates the districts where most of the students are towards the lower class intervals.

06. Some Observations:

Coming down to the analysis of the performances it becomes amply clear that in the First Language the largest number of students was within the class of marks 20 –39 indicating thereby a better level of performance. Similar is the case with Arithmetic as well. The skewness of the frequency distribution corroborates this conclusion. **Tables showing Overall Summary Report (District-wise) of Evaluation:** Each Table corresponding to each of the districts is self explanatory in nature. Quite in tune with the picture of performance of the State as a whole, both the boys and the girls in terms of percentages were the highest in the Class of Marks 20 –39 as will be evident in The Tables: District wise Performance Analysis.

When the mean marks in First Language for boys are taken into consideration Kolkata tops the list among districts with a mean marks of 34.25 while Purba Medinipur closely follows Kolkata with 33.09 mean marks and Burdwan takes on the third position with a mean marks of 32.55.

So far as the performances of the girls in First Language are concerned, judged by the mean marks Kolkata tops the list with a mean marks of 35.96 followed by Purba Medinipur with 34.16 and Howrah takes on the third position with a mean marks of 33.65.

When the mean marks in English for boys are taken into consideration Kolkata tops the list among districts with mean marks of 34.14 while Burdwan closely follows Kolkata with 32.60 mean marks and Howrah takes on the third position with mean marks of 32.50.

So far as the performances of the girls in English are concerned, judged by the mean marks Kolkata tops the list with a mean marks of 35.13 followed by Howrah with 33.10 and Burdwan takes on the third position with a mean marks of 32.82.

When the mean marks in Arithmetic for boys are taken into consideration Purba Medinipur tops the list among districts with a mean marks of 32.14 while Burdwan closely follows with 31.72 mean marks and Kolkata takes on the third position with a mean marks of 30.91.

So far as the performances of the girls in Arithmetic are concerned, judged by the mean marks Purba Medinipur tops the list with a mean marks of 32.33 followed by Burdwan with 32.07 and Kolkata takes on the third position with a mean marks of 31.93.

An analysis of the category wise performance indicated by mean marks suggests that so far as the **First Language** is concerned the highest mean marks among the districts so far as **ST** category is concerned has been obtained by Kolkata (35.95), Howrah (33.97) and Burdwan (30.67) closely following each other. For **SC** Candidates Kolkata (33.88) is followed by Purba Medinipur (32.30) and then by Howrah (31.72). In First Language among **others** Kolkata (35.17) is followed by Burdwan in the list with mean marks of (34.43) closely followed by Purba Medinipur with a mean marks of 33.95.

An analysis of the category wise performance indicated by mean marks suggests that so far as the **English** is concerned the highest mean marks among the districts so far as **ST** category is concerned has been obtained by Kolkata (37.50), Howrah (33.25) and Burdwan (30.62) closely following each other. For **SC** Candidates Kolkata (32.53) is followed by Howrah (31.58) and then by Purba Medinipur (31.32). In English among **others** Kolkata (34.72) is followed by Burdwan in the list with mean marks of 34.00 closely followed by Howrah with a mean marks of 33.11.

Among the **SC** candidates in **Arithmetic** Purba Medinipur with a mean marks of 31.11 is followed by Burdwan with 30.69 and then by Howrah with 30.38. So far as **ST** category is concerned Kolkata with 35.16 is followed by Howrah with 31.43 and then by Purba Medinipur with 29.97. In the "**Others**" Category Burdwan with a mean score of 33.04 tops the list closely followed by Purba Medinipur with 32.51 while Paschim Medinipur now takes the third seat with 31.72.

07. CONCLUDING REMARKS:

01. Participation is quite encouraging with girls marginally higher in participation than that of the boys.

02. With a target of cent percent participation much progress has been achieved yet much remains to be done to fill up the gap (nearly 20%) between total enrolment and total participation.

03. Performance levels are more or less encouraging; the highest mean score for boys in the First Language is 34.25, full marks being 50 and Kolkata does it. In English with full marks of 50, boys in Kolkata reach the highest mean score of 34.14. In Arithmetic with full marks of 50, boys in Purba Medinipur reach the mean marks of 32.14. Similarly for girls the highest mean among the districts is scored by Kolkata in the First Language (35.96), English (35.13) and Arithmetic with full marks of 50 girls in Purba Medinipur reach the mean marks of (32.33). The table below shows the positions upto 5th of districts according to their performance.

Position of the Districts in Performance Matrix :

POSITION	FIRST LANGUAGE		ENGLISH		ARITHMETIC	
	District	Mean Marks	District	Mean Marks	District	Mean Marks
1ST	KOLKATA	35.13	KOLKATA	34.65	PURBA MEDINIPUR	32.24

	District	Mean Marks	District	Mean Marks	District	Mean Marks
Boys	KOLKATA	34.25	KOLKATA	34.14	PURBA MEDINIPUR	32.14
Girls	KOLKATA	35.96	KOLKATA	35.13	PURBA MEDINIPUR	32.33

04. Analysis of the data through tabulation, graphs and charts makes it clear that so far as performance levels as indicated by mean marks are concerned, Kolkata, Purba Medinipur, Paschim Medinipur, the 24 Parganas (both North & South), and Burdwan keep up to the mark.

05. Subject wise highest mean marks expressed in percentages places Kolkata on the top. The table below indicates this

Subject wise Highest (average) Achievement (Score in percentages)

Subject	Score (Achievement Level) %	District
First Language	70.26	KOLKATA
English	69.30	KOLKATA
Arithmetic	64.48	PURBA MEDINIPUR

06. An analysis of the districtwise results for the last few years however, makes it clear that the districts of Kolkata, Purba Medinipur. Paschim Medinipur, Burdwan, North 24 Parganas, have maintained their trend of progress quite steadily. The district of Howrah has made much progress to secure a birth in position of the Districts in Performance Matrix. The districts of Jalpaiguri, Malda, Purulia and Uttar Dinajpur, Dakshin Dinajpur, Murshidabad lie far below the State Average (State Mean) and call for promotional measures.

07. This time district and circle wise Mean Marks for each district have been shown in tables in Appendix. As the Students of SSKs and Madrasahs are also covered by this Evaluation, State and District Mean Marks for the S.S.Ks and Madrasahs on data as available have also been shown separately.
